

The Chehalis Valley Amateur Radio Society, Lewis County Amateur Radio Emergency Service and Centralia Amateur Radio Emergency Service are combining forces again this year for the annual Amateur Radio Relay League Field Day June 23 to 25, 2017.

This year's Field Day event will again be held in shelter #1, Borst Park, just off Interstate 5 at Exit 82 in Centralia. Come out on Friday evening to help set up and then on Saturday to operate on one or more bands. The figure below shows the proposed location of vehicles and equipment in the area.

Field Day is practice for emergencies, an informal contest, a camp out, a picnic, and, most of all, FUN! Six Amateur Radio stations on site will be working all the bands:

- 2 meter
- 6 meter
- HF
- Voice
- Digital
- Morse Code (CW)

A wide variety of emergency power systems, equipment, antennas, and radios will be available to see and use.

Please consider attending this year's Field Day event at Borst Park. Work a radio, learn how to do something new in Amateur Radio, share some great food, or just visit. Even if you just have a few minutes to drop by, we'd love to see you. It's a great time to learn more about what's happening in Amateur Radio in our area.
