2	146.46	Ray KD7EF

Anyone unable to be net control as scheduled must find his own replacement.

REGULAR MONTHLY MEETING _ _ _ _ -May 1st _ _ _ -7:30

Cookies: Hollis

BREAKFAST _ _ -May 18

At the April breakfast there were six guests from Olympia.

We heard that Doug KA7ODR hasn't dropped any trees on his house yet but there are probably several chances for the wrong thing to happen before he finishes the project.

Sandy W7DHZ broke his arm last month . He modified his cast with a hacksaw so he could use his fingers better. He and Marguerite are in Oregon now.

Exams

Exams were on April 27 and there was a very good turn out.. Several volunteer examiners helped. John Kemp WB7ATP, Roy Myklebust W7GYB, and Yvonne Clark KA7JPK supervised the testing and food station. Congratulations to all those who passed the test for upgrade. Sympathy to those who didn't pass and better luck next time. 13 wpm seemed more like 50 to some of us.

Chartley KA7PIZ, is back from California. She visited a brother who is ill..

Art N7EIK, and Lynn vacationed in California and Arizona. They arrived back before the swap meet.

FIELD DAY

Field day will be held 22 and 23 of June instead of the last weekend at Stan Hedwall Park. Talk to Sandy about when you want to work and what you can donate..

The club has been talking about an honorarium to get more speakers. There has been discussion about a club historian also. Think about these ideas and let's talk about them.
