

OMEHALIS VALLEY AMATEUR RADIO SOCIETY

March, 1984

Net Schedule-----8 p.m.

March 4	146.46	Tim N7BFG
11	145.43/4.83	Roy W7GYB
18	145.43/4.83	Yvonne KA7JPK
25	145.43/4.83	Ray KD7EF

Anyone unable to be net control as scheduled must find their own replacement.

UPGRADE CLASS

The upgrade class meets at the Club House from 7 to 9 pm Tuesday night. The group is small and more would make it more interesting. A different topic is discussed each week following the outline for General Class in the ARRL handbook. Come and learn something new or help others learn.

VOLUNTEER EXAMINER PROGRAM

The Volunteer Examiner program is alive and well. Several club members have signed up and more are needed who may be willing to help occasionally with testing for the General and Technician class license. We particularly need anyone with an Extra Class license. For more information, contact Grant Hollis, KD7AB, 736-6139.

NOVICE NET

We are trying to organize a novice net to help anyone wanting to increase code speed. The code speed will start at 5 wpm and increase as participants are able. At present the frequency is 3745 or thereabouts at 9 pm PST on Thursday and Sunday. Procedure is informal to start with. We will try to include some simple net procedure eventually to help new people check in.

WORK PARTIES

Don't forget the workparty Wednesday nights. Things are coming along fine at the clubhouse. Especially appreciated is the now functional restroom.

GENERAL CLUB MEETING -- March 7<sup>th</sup>

Cookies: LaFond and Morley

Program: USE OF VACUUM TUBE VOLTMETER given by Gene Hughs, KB7GO

BREAKFAST

Lynn Williams has volunteered to buy the door prizes for the radio club breakfast. Thanks Lynn.

MANURE!!!

Free Chicken Manure---call KA7EOV (ex-chicken farmer) Lenny are you sure that is what it is?

*Lenny KA7JTA*
